## DSL Internet

A private, high-speed broadband connection to the Internet

Basic	Everyday	Family	Entertainment
<b>6Mbps/1Mbps</b>	<b>10Mbps/1Mbps</b>	<b>15Mbps/1Mbps</b>	<b>25Mbps/5Mbps</b>
\$49.99	\$59.99	\$69.99	\$79.99
Good for browsing the Internet, emails, or Social Media.	For homes with multiple devices all connecting to the internet.	For work, family, video game players, or streaming movie viewers.	For multiple streaming devices, online file storage and more!

\*Actual speeds may vary based on location and equipment.

### DSL (Digital Subscriber Line) service

- Works over existing phone lines without the need for a second line.
- Uses advanced filtering technology, so you can be on the phone and online – at the same time!
- Isn't a shared technology (like cable modems) — you have your own private “pipe” right to the Internet, giving you superior security and uncompromised speeds.
- Is highly reliable (due to GTel's state-of-the-art network of two independently operating fiber optic rings), giving you the reliability you need to stay connected to friends, family and business associates.
